You've got the power – to **network**

With PostTrade 360° 2025 being an on-site-only event, what's the use of a digital platform? Good question!

The answer is basically that with the incredible wealth of content and colleagues, we want you to feel lost in a good way – chatting too long with nice acquaintances, old and new, and drinking too much good coffee. Not, you know, just lost lost.

Your account is created when you sign up, so as a delegate, you definitely have one. There is a "Forgot" link if you need to reset your password. You can access everything both through the web and in our "B2match" phone app. You use the same login on both interfaces.

Note that adding a session to your personal schedule does not commit you to attend it (except for the dinner and possibly exclusive sessions where very clearly communicated). Conversely, it does not guarantee your seat, so come in good time where you suspect a full room. We expect the platform to keep working for another couple of months after the event, so there will be plenty of time to wrap up new connections and dialogues before we eventually shut it all down.

Through posttrade360.com, our news site, you will be able to find loads of sessions as videos after the event. With your registration as a delegate, we should automatically have registered you for our newsletters, so expect us to keep you informed. And who knows … in next year, we might be offering even more powerful matchmaking functionality on the platform! ■

Downloaded the "B2match" app yet?
Schedule sessions, manage meetings, message!
